Use Case

Problem Statement

- **Clinical Pain Point:** Overcrowded government hospital OPDs handle 800+ patients/day with <90s per triage, causing acute nurse fatigue and a 15–20% under-triage rate on subtle illnesses (atypical STEMI, hypoxia).
- **Affected Stakeholders:** Patients face silent deterioration in waiting rooms; regional language barriers (Telugu, Hindi) worsen miscommunication. Clinicians face high burnout; hospital administration faces ICU bed bottlenecks.
- **Current Impact:** A 10-minute delay in resuscitation raises mortality by 8–12%. Existing black-box AI fails: hallucinates on noisy sensors and gets tricked by hyperbolic complaints.

- Describe the problem or pain point you are addressing
- Who are the affected users/stakeholders?
- What is the current impact or consequence?

Market Opportunity

- Market size and growth potential
- Target audience demographics
- Competitive landscape

Proposed Solution

Solution Overview

- • What is your solution?
- • How does it address the problem?
- • What are the key features and benefits?
- • Why is your approach unique?

Design Steps & Architecture

Technical Implementation

1. [Step 1 - Description]
2. [Step 2 - Description]
3. [Step 3 - Description]
4. [Step 4 - Description]

Architecture Diagram

Challenges & Mitigation

Challenge 1

Problem: [Describe challenge]
Mitigation: [How you addressed/will address it]

Challenge 2

Problem: [Describe challenge]
Mitigation: [How you addressed/will address it]

Challenge 3

Problem: [Describe challenge]
Mitigation: [How you addressed/will address it]

Unique Selling Proposition (USP)

Key Differentiator 1

[What makes your solution unique in this aspect?]

Key Differentiator 2

[What makes your solution unique in this aspect?]

Key Differentiator 3

[What makes your solution unique in this aspect?]

Competitive Advantage Summary

- • Why customers should choose your solution
- • Your competitive edge vs. existing alternatives
