Use Case

Problem Statement

• **Clinical Pain Point:** Overcrowded government hospital OPDs handle 800+ patients/day with <90s per triage encounter, leading to severe cognitive fatigue and a 15–20% under-triage rate on subtle life-threats (e.g. atypical STEMI, hypoxia, internal shock).

• **Affected Stakeholders:** Patients face silent deterioration in waiting rooms; regional language barriers (Telugu, Hindi) worsen miscommunication. Clinicians face high burnout; hospital administration faces ICU bed saturation and medico-legal liability.

• **Current Impact:** A 10-minute delay in resuscitation raises mortality by 8–12%. Existing black-box AI fails: hallucinates on noisy sensors and gets tricked by hyperbolic complaints.

Market Opportunity

• **Market Size & Rapid Growth:** Global CDSS market is .1B (2025), expanding to .8B by 2030 (18.2% CAGR). Digital emergency healthcare adoption is accelerating under India's Ayushman Bharat Digital Mission (ABDM).

• **Target Demographics:** High-volume government district casualty wards facing bilingual footfalls (AP, Telangana, PAN-India) and tertiary multi-specialty trauma networks (Apollo, Care, KIMS) requiring standardized ESI triage.

• **Competitive Landscape:** Manual ESI/Manchester triage is slow with 30% inter-rater inconsistency; generic LLMs lack safety bounds; TriageGuard provides verified finite-sample safety, monotonic ML, and deterministic safety rules.

Proposed Solution

Solution Overview

- • What is your solution?
- • How does it address the problem?
- • What are the key features and benefits?
- • Why is your approach unique?

Design Steps & Architecture

Technical Implementation

1. [Step 1 - Description]
2. [Step 2 - Description]
3. [Step 3 - Description]
4. [Step 4 - Description]

Architecture Diagram

Challenges & Mitigation

Challenge 1

Problem: [Describe challenge]
Mitigation: [How you addressed/will address it]

Challenge 2

Problem: [Describe challenge]
Mitigation: [How you addressed/will address it]

Challenge 3

Problem: [Describe challenge]
Mitigation: [How you addressed/will address it]

Unique Selling Proposition (USP)

Key Differentiator 1

[What makes your solution unique in this aspect?]

Key Differentiator 2

[What makes your solution unique in this aspect?]

Key Differentiator 3

[What makes your solution unique in this aspect?]

Competitive Advantage Summary

- • Why customers should choose your solution
- • Your competitive edge vs. existing alternatives
